Home and Community-Based Services (HCBS) Quality Measure Set (QMS): Quality Improvement Plan (QIP) Reporting Form Help File

About This Help File

This help file provides guidance for completing the QIP Reporting Form in the Medicaid Data Collection Tool (MDCT). Questions from the reporting form are presented in black text, while guidance is presented in teal text and identified with a star (★). Examples of responses are presented in *teal italicized* text. Appendix A provides a preview of the QIP reporting questions and fields for reference purposes only. All QIP reporting must be completed and submitted through MDCT.

E. QI Plan Details 9

Appendix A. QIP Reporting Form Preview (For Reference Only) 11

QIP Help File

A. General Information

★ **Guidance:** This section captures administrative and contextual details about the QIP submission. States and territories should enter basic identifying information, including the point of contact and the lead agency or division responsible for the Quality Improvement (QI) strategy. These details support CMS in tracking submissions and following up with states and territories.

1. Contact name/title

   ★ **Guidance:** Provide the name and title of the primary contact for this submission. This individual should be able to respond to CMS inquiries and provide additional documentation or information about the QI strategy if needed.

2. Contact email address

   ★ **Guidance:** Provide the email address of the primary contact for this submission. Department or program-wide email addresses are allowed.

3. Lead Agency/Division responsible

   ★ **Guidance:** Identify the state or territory agency or division leading the QI strategy. This may be the Medicaid agency, a division overseeing HCBS programs, or a cross-agency QI team.

4. Select all HCBS authorities included in this quality improvement plan for the reporting period.

   ➔ If an HCBS authority is not included above but is included in this QIP, add its name and control number here.

   ★ **Guidance:** The control number for 1115 demonstrations and section 1915(b) and 1915(c) waiver authorities can be found on the State Waivers List webpage on Medicaid.gov: https://www.medicaid.gov/medicaid/section-1115-demo/demonstration-and-waiver-list. Navigate to the state or territory authority in question, and the control number is displayed in parentheses after the state or territory and demonstration or waiver authority title (ex. the control number for "AL Community Waiver Program (1746.R00.00)" is 1746.R00.00). The control number for an 1115 demonstration is commonly called the "project number," and the control number for a section 1915(c) waiver authority is commonly called a "waiver ID number."

   The control number for 1915(i), 1915(j), and 1915(k) state plan amendments (SPAs) can be found on the Medicaid State Plan Amendments webpage on Medicaid.gov: https://www.medicaid.gov/medicaid/medicaid-state-plan-amendments. Navigate to the state or territory SPA in question, and the control number is displayed after the transmittal number, colon, and state or territory abbreviation (ex. the control number for "Transmittal Number: WY-25-0001" is 25-0001).

B. Select Measures & Targets

★ **Guidance:** This section should note which of the HCBS QMS measures that the QI strategy seeks to impact. This section includes fields for documenting baseline data and performance targets. The performance target timeframe should be within the next reporting period. Add measures that are applicable to the QI strategy. Select at least two measures that are related to your QIP. States and territories may select more measures when the strategy is expected to affect multiple outcomes or domains, such as person-centered planning, community integration, transportation, safety, or transitions from institutional settings.

[Add Measure]

1. Measure report
   - ★ **Guidance:** Select the measure from the dropdown that is applicable to your QIP.

2. Please select from which submitted Quality Measure Set report you would like to copy over baseline values (optional)
   - ★ **Guidance:** Only the long-term services and support (LTSS) measures and Personal Outcome Measures® (POM®) submitted as part of the HCBS QMS report in the Medicaid Data Collection Tool (MDCT) are available for copy-over. For these measures, you may select to add the baseline values from the HCBS QMS report or re-enter in the QIP. For Money Follows the Person (MFP) grant recipients that report on National Core Indicators®-Intellectual and Developmental Disabilities (NCI®-IDD), National Core Indicators-Aging and Disabilities (NCI-AD™), and/or HCBS Consumer Assessment of Healthcare Providers and Systems (CAHPS)®, the baseline value and the performance target values are captured outside of MDCT. MFP grant recipients will need to coordinate internally to input the reported value in this section.

3. Which delivery sub-type will you be reporting on?
   - ★ **Guidance:** Select if the state or territory will report just the FFS LTSS version of the measure, the MLTSS version of the measure, or both the FFS LTSS and MLTSS versions of the measure. MLTSS refers to Medicaid managed care plans that cover LTSS.

4. What rates will you be reporting on?
   - ★ **Guidance:** Select one or more rates that are applicable to your QIP.

Baseline and Performance Target Information

Baseline Rate Values

★ **Guidance:** This section includes the baseline value for the rate(s) you selected that are applicable to your QIP. The fields included will be based on your selections when adding a measure. For example, if you selected both the FFS and MLTSS delivery methods, you will enter the baseline rate values for each delivery method.

5. Performance Rate
   - ★ **Guidance:** Enter the baseline rate for the measure. If you elect to copy over your baseline values from the HCBS QMS report, this field will be pre-populated.

6. Baseline Measurement Period

    a. Baseline Measurement Start

    b. Baseline Measurement End

    ★ **Guidance:** Report the baseline measurement start and end dates that the baseline value represents. Use the format of MM/YYYY.

Performance Target Values

★ **Guidance:** This section includes the performance target value for the rate(s) you selected that are applicable to your QIP. The fields included will be based on your selections when adding a measure. For example, if you selected both the FFS and MLTSS delivery methods, you will enter the baseline rate values for each delivery method.

7. Target Rate

    ★ **Guidance:** Enter the target rate for the measure.

8. Performance Target Timeframe

    ★ **Guidance:** Enter the target timeframe for reaching the target rate. This should be by the end of the next reporting period. Use the format of MM/YYYY.

9. Notes on Relevance (Optional)

    ★ **Guidance:** Include 1-2 sentences explaining how the selected measure aligns with the quality issue, intervention, and intended outcome.

        - ***Example:*** *"[State/territory] selected Consumer Assessment of Healthcare Providers and Systems Home and Community-Based (HCBS CAHPS®): Planning Your Time and Activities Composite Measure because the strategy is intended to increase participants' opportunities to make choices and participate in activities outside the home. [State/territory] also selected National Core Indicators – Aging and Disabilities (NCI-AD™) transportation measures and National Core Indicators® – Intellectual and Developmental Disabilities (NCI®-IDD) CI-3 Transportation Availability Scale because transportation access was identified as a common barrier to community participation across waiver programs."*

C. QI Plan Overview

★ **Guidance:** This section introduces the state's or territory's QI strategy and establishes its foundational context. States and territories should provide the start and end dates (estimated, if relevant), and a clear and concise description of the strategy. This information helps CMS understand the scope and focus of the QI strategy and how it aligns with the HCBS QMS. Use this section to set the stage for the more detailed planning and implementation components that follow.

1. Strategy description

   ★ **Guidance:** Provide a high-level summary (less than 500 words) of your QI strategy. Include in your summary (1) the planned intervention(s), (2) relevant partners, (3) the population(s) affected, and (4) the rationale for the strategy. If appropriate, consider including information about the setting(s) of care or delivery systems involved, and the intervention(s) being tested and/or implemented.

      - ***Example:*** *"[State/territory] will implement a targeted technical assistance and monitoring strategy to improve timely updates to person-centered service plans (LTSS-2: Comprehensive Person-Centered Plan and Update) for adults receiving HCBS through managed care plans that cover managed long-term services and supports (MLTSS). The strategy focuses on individuals whose plans were not updated within required timeframes during the baseline measurement period. The state/territory will use case management system data to identify overdue plans, provide targeted training to care coordinators, and conduct monthly reviews with Medicaid MLTSS plans to address workflow barriers and improve performance on LTSS-2."*

2. Strategy timeframe

   a. Start month

   ★ **Guidance:** Enter the start month for strategies in progress, or the estimated future start month. Use the format MM/YYYY.

   b. Projected end month (optional)

   ★ **Guidance:** Enter the projected end month or leave blank if the strategy will be ongoing without a set end point. Use the format MM/YYYY.

D. Key Activities

★ **Guidance:** This section provides a high-level list and expected completion month (if available) of activities needed to implement, monitor, and evaluate the QI strategy. Activities should be specific enough to show the sequence of work, responsible functions, and major milestones, but they do not need to include every operational task. Include planning, stakeholder engagement, data analysis, intervention launch, monitoring, feedback loops, and evaluation activities as applicable. Provide at least one activity to support your QIP.

1. Title or description

   ★ **Guidance:** For each activity, include a one sentence title or description of the activity.

2. Expected completion month (optional)

   ★ **Guidance:** For each activity, enter the projected completion month or leave blank if one cannot be determined. Use the format MM/YYYY. Two example key activity timelines are provided on the following pages.

- ***Example 1:*** *"Sample timeline for a participant safety, respect, and incident prevention strategy"*

Activity	Expected Completion Month (Optional)
Establish QI team with Medicaid HCBS quality staff, incident management staff, waiver operating agencies, adult protective services or other safety partners, providers, participant advocates, and people with lived experience.	[Select MM/YYYY]
Analyze HCBS QMS survey findings, critical incidents, grievances, appeals, case reviews, and provider monitoring results to identify recurring safety and respect concerns.	[Select MM/YYYY]
Stratify results by waiver program, provider type, residence type, region, age group, disability population, and delivery system when data are available and reliable.	[Select MM/YYYY]
Review findings with participant advisory group and provider representatives to confirm root causes and identify feasible improvement actions.	[Select MM/YYYY]
Update participant-facing materials on rights, reporting options, and escalation pathways; develop provider guidance on prevention, documentation, and follow-up expectations.	[Select MM/YYYY]
Deliver targeted training and technical assistance to case management entities, providers, Medicaid MLTSS plans, and state/territory monitoring staff.	[Select MM/YYYY]
Implement enhanced monitoring process for selected providers, settings, regions, or plans with elevated concerns or lower measure performance.	[Select MM/YYYY]
Review monitoring results, incident follow-up timeliness, grievance themes, and participant feedback; adjust training or oversight activities as needed.	[Select MM/YYYY]
Complete evaluation summary and determine whether to scale, adapt, continue, or discontinue the safety and respect intervention.	[Select MM/YYYY]

- ***Example 2:*** *"Sample timeline for a community integration, transportation, and personal goals strategy"*

Activity	Expected Completion Month (Optional)
Assemble cross-functional QI team, including Medicaid program staff, waiver operating agencies, data staff, Medicaid MLTSS or case management entities, providers, transportation partners, and participant representatives.	[Select MM/YYYY]
Review HCBS QMS, case management, grievance, and transportation data to identify populations, programs, regions, or plans with lower performance or greater access barriers.	[Select MM/YYYY]
Conduct participant listening sessions or advisory group discussions to validate barriers and identify practical improvement opportunities.	[Select MM/YYYY]
Develop intervention materials, including referral workflow, provider guidance, and a monitoring dashboard.	[Select MM/YYYY]
Train case managers, Medicaid MLTSS plans, providers, and transportation or community partners on the new workflow and documentation expectations.	[Select MM/YYYY]
Launch pilot in selected waiver programs, regions, plans, or provider networks.	[Select MM/YYYY]
Review monitoring data and qualitative feedback; identify early implementation barriers and needed adjustments.	[Select MM/YYYY]
Refine intervention based on pilot findings and expand to additional populations, regions, plans, or providers as appropriate.	[Select MM/YYYY]
Complete interim evaluation and determine whether to continue, scale, adapt, or discontinue the strategy based on results and stakeholder feedback.	[Select MM/YYYY]

E. QI Plan Details

1. Monitoring approach

   ★ **Guidance:** Describe how you have tracked or will track changes in performance relative to the intended target. Include the types of analysis used, such as run charts, trend analysis, stratified analysis, comparison to baseline, or benchmark comparisons, as well as the planned reporting cadence. Describe any interim process measures or implementation indicators that will be reviewed before final HCBS QMS performance results are available. Also consider how qualitative data, such as focus groups, interviews, case reviews, grievance themes, provider feedback, or participant advisory group input, could be used to validate and complement quantitative findings. Responses should generally be 250-300 words.

      - ***Example:*** *"[State/territory] will monitor progress using both outcome and process indicators. The primary outcome measure is LTSS-2: Comprehensive Person-Centered Plan and Update, using the baseline value reported for the 2025 performance period and the 2028 performance target submitted through HCBS QMS reporting. Because final HCBS QMS data will not be available continuously, [State/territory] will also track monthly process measures from the case management system, including the number and percentage of active HCBS participants with service plans due in the next 60 days, overdue plans, completed updates, and documented participant involvement in the planning process. Data will be summarized monthly and reviewed by the QI team, with quarterly trend reports shared with Medicaid leadership and MLTSS plans. [State/territory] will use run charts to assess whether performance is improving over time and will stratify results by MLTSS plan, region, waiver program, and age group when data are available and reliable. Medicaid MLTSS plans with higher rates of overdue plan updates will receive targeted follow-up and will be asked to submit brief root cause summaries and corrective actions. [State/territory] will complement quantitative monitoring with qualitative information from care coordinator feedback, participant advisory group discussions, and a sample of case record reviews. These qualitative sources will help [State/territory] understand whether workflow changes are feasible, whether participants are meaningfully engaged in plan updates, and whether additional technical assistance or policy clarification is needed."*

2. Evaluation summary

   ★ **Guidance**: Summarize how the QI strategy was or will be assessed and what results the team hopes to observe, such as claims, encounter data, case management systems, assessment systems, survey data, critical incident systems, grievances and appeals, provider reports, MLTSS plan submissions, or participant interviews. Identify the success criteria that will be used to determine whether the strategy is on track or successful. Describe any known limitations, such as data lags, missing demographic fields, small sample sizes, survey response rates, or variation in documentation practices, and any plans to improve data reliability. Describe how frequently your team reviewed or will review data, who is involved in monitoring and evaluation activities, and how findings are communicated internally or externally. Responses should generally be 250-300 words.

      - ***Example:*** *"[State/territory] will evaluate the QI strategy by comparing interim monitoring results and final performance against the baseline values and 2028 performance targets*

submitted for the selected measures. The strategy will be considered on track if interim process indicators show sustained improvement for at least two consecutive quarters and if final measure results move in the intended direction for selected community inclusion and transportation measures. Success criteria may include increases in the percentage of participants reporting that they can participate in the community as much as they would like and have transportation when needed.

Data sources will include HCBS QMS survey results, case management system records, claims or encounter data, critical incident reports, grievances and appeals, Medicaid MLTSS plan or provider submissions, participant interviews, and advisory group feedback. [State/territory] will review interim data monthly during active implementation and quarterly thereafter, with participation from Medicaid program staff, quality staff, data analysts, waiver operating agencies, Medicaid MLTSS plans or case management entities, providers, and participant representatives. Known limitations include time lags in HCBS CAHPS® survey results, small sample sizes for some subgroups, variation in documentation practices across programs, and incomplete demographic data. To address these limitations, [State/territory] will document data definitions, conduct periodic data quality checks, review subgroup results only when sample sizes are sufficient, and use qualitative information to interpret trends that cannot be fully explained through administrative or survey data alone."

Appendix A. QIP Reporting Form Preview (For Reference Only)

This appendix provides a preview of the QIP reporting questions and fields for reference purposes only. The content that follows is reproduced from the MDCT to illustrate the reporting form as it appears in MDCT. States and territories must complete and submit all QIP reporting through the MDCT; the appendix is not intended to be completed or submitted separately.

BACKGROUND

The Quality Improvement Plans (QIP) form is intended to capture information about MFP grant recipients' QI targets and strategies. MFP grant recipients are required to establish performance targets and develop QI plans for two mandatory measures in fall 2026. CMS will use this information to assess MFP grant recipients' progress toward improving HCBS quality, identify opportunities for support, and inform future guidance and policy development. Please see the accompanying help file for additional guidance regarding how to complete each section of this form. Questions about this form or requests for technical assistance may be directed to HCBSQuality@cms.hhs.gov.

INSTRUCTIONS

Creating a New Report

Click the "Start Quality Improvement Plan" button to begin creating your report. Once the report is generated, you can edit its name and monitor the status in the dashboard below. A series of questions will appear to gather the necessary information for your report. Fill out each required field and, before submitting, confirm your entries and review the information you've provided.

Enter a report for each of your state's quality improvement plans. If your state employs multiple QIPs, you will need a separate report for each one. States may use the same quality improvement plan for more than one mandatory measure.

Understanding Report Statuses

- **Not started:** The report has been created but no data has been entered or actions taken.
- **In progress:** The report is actively being worked on, with some or all data entered.
- **Submitted:** The report has been completed and submitted to CMS for review.
- **In revision:** The report has been sent back to the state for revisions or additional information after submission.

Use the dashboard below to check your report's status and take any necessary follow-up actions.

A. General Information

1. Contact name/title

Provide name and/or title of the primary point of contact for follow-up regarding this QIP submission.

[Response field]

2. Contact email address

Enter an email address for the person or position above. Department or program-wide email addresses are allowed.

[Response field]

3. Lead Agency/Division responsible

Identify the lead state agency or division responsible for this plan.

[Response field]

4. Select all HCBS authorities included in this quality improvement plan for this reporting period.

Select all that apply.

[HCBS authority options are populated based on the state associated with the submission.]

➔ **If an HCBS authority is not included above, but included in this QIP, add its name and control number here.**

➔ **Name and control number (if applicable)**

[Response field]

B. Select Measures & Targets

Instructions

Add the HCBS measures, using the Add Measure button, that are related to this QIP and indicate the baseline value, baseline measurement period, performance target value, and performance target timeframe for each selected measure. The performance target timeframe should be within the next reporting period.

The baseline value for the LTSS and POM measures can be found in the Quality Measure Set of the Medicaid Data Collection Tool (MDCT) and may be copied over from any submitted QMS report.

For MFP grant recipients that report on NCI-IDD, NCI-AD, and/or HCBS CAHPS, the baseline value and the performance target values are captured outside of MDCT. MFP recipients will need to coordinate internally to input the reported value in this section.

[Add Measure]

Select a measure from the dropdown to add to this Quality Improvement Plan. You may either enter the measure rate details or copy the baseline values from an existing HCBS QMS where possible.

Measure report

[Select measure from dropdown. Fields and response options vary based on the measure selected. The applicable fields for each measure are provided below.]

LTSS-1: Comprehensive Assessment and Update

➔ **Please select from which submitted Quality Measure Set report you would like to copy over baseline values (optional)**

Only measures submitted as part of the HCBS Quality Measure Set report are available for copy-over.

[Select report from dropdown.]

➔ **Which delivery sub-type will you be reporting on?**

- ☐ Delivery Method: MLTSS
- ☐ Delivery Method: FFS LTSS

➔ **Which rates will you be reporting on?**

- ☐ Performance Rate: Assessment of Core Elements
- ☐ Performance Rate: Assessment of Supplemental Elements
- ☐ Exclusion Rate: Participant could not be contacted
- ☐ Exclusion Rate: Participant refused assessment

LTSS-2: Comprehensive Person-Centered Plan and Update

➔ **Please select from which submitted Quality Measure Set report you would like to copy over baseline values (optional)**

Only measures submitted as part of the HCBS Quality Measure Set report are available for copy-over.

[Select report from dropdown.]

➔ **Which delivery sub-type will you be reporting on?**

- ☐ Delivery Method: MLTSS
- ☐ Delivery Method: FFS LTSS

➔ **Which rates will you be reporting on?**

- ☐ Performance Rate: Assessment of Core Elements
- ☐ Performance Rate: Assessment of Supplemental Elements
- ☐ Exclusion Rate: Participant could not be contacted
- ☐ Exclusion Rate: Participant refused person-centered planning

LTSS-6: Admission to a Facility from the Community

➔ **Please select from which submitted Quality Measure Set report you would like to copy over baseline values (optional)**

Only measures submitted as part of the HCBS Quality Measure Set report are available for copy-over.

[Select report from dropdown.]

➔ **Which delivery sub-type will you be reporting on?**

- ☐ Delivery Method: MLTSS
- ☐ Delivery Method: FFS LTSS

➔ **Which rates will you be reporting on?**

- ☐ 18 to 64 years: Short term stay rate
- ☐ 18 to 64 years: Medium term stay rate
- ☐ 18 to 64 years: Long term stay rate
- ☐ 65 to 74 years: Short term stay rate
- ☐ 65 to 74 years: Medium term stay rate
- ☐ 65 to 74 years: Long term stay rate
- ☐ 75 to 84 years: Short term stay rate
- ☐ 75 to 84 years: Medium term stay rate
- ☐ 75 to 84 years: Long term stay rate
- ☐ 85 years or older: Short term stay rate
- ☐ 85 years or older: Medium term stay rate
- ☐ 85 years or older: Long term stay rate

LTSS-7: Minimizing Facility Length of Stay

➔ **Please select from which submitted Quality Measure Set report you would like to copy over baseline values (optional)**

Only measures submitted as part of the HCBS Quality Measure Set report are available for copy-over.

[Select report from dropdown.]

➔ **Which delivery sub-type will you be reporting on?**

- ☐ Delivery Method: MLTSS
- ☐ Delivery Method: FFS LTSS

➔ **Which rates will you be reporting on?**

- ☐ Observed Performance Rate for Minimizing Length of Facility Stay
- ☐ Expected Performance Rate for Minimizing Length of Facility Stay
- ☐ Risk Adjusted Performance Rate for Minimizing Length of Facility Stay

LTSS-8: Successful Transition after Long-Term Facility Stay

➔ **Please select from which submitted Quality Measure Set report you would like to copy over baseline values (optional)**

Only measures submitted as part of the HCBS Quality Measure Set report are available for copy-over.

[Select report from dropdown.]

➔ **Which delivery sub-type will you be reporting on?**

- ☐ Delivery Method: MLTSS
- ☐ Delivery Method: FFS LTSS

➔ **Which rates will you be reporting on?**

- ☐ Observed Performance Rate for Successful Transition after Long-Term Facility Stay
- ☐ Expected Performance Rate for Successful Transition after Long-Term Facility Stay
- ☐ Risk Adjusted Performance Rate for Successful Transition after Long-Term Facility Stay

POM: People Live in Integrated Environments

➔ **Please select from which submitted Quality Measure Set report you would like to copy over baseline values (optional)**

Only measures submitted as part of the HCBS Quality Measure Set report are available for copy-over.

[Select report from dropdown.]

➔ **Which delivery sub-type will you be reporting on?**

- ☐ Delivery Method: MLTSS
- ☐ Delivery Method: FFS LTSS

➔ **Which rates will you be reporting on?**

- ☐ Performance Rate

POM: People Participate in the Life of the Community

➔ **Please select from which submitted Quality Measure Set report you would like to copy over baseline values (optional)**

Only measures submitted as part of the HCBS Quality Measure Set report are available for copy-over.

[Select report from dropdown.]

➔ **Which delivery sub-type will you be reporting on?**

- ☐ Delivery Method: MLTSS
- ☐ Delivery Method: FFS LTSS

➔ **Which rates will you be reporting on?**

- ☐ Performance Rate

POM: People Choose Services

➔ **Please select from which submitted Quality Measure Set report you would like to copy over baseline values (optional)**

Only measures submitted as part of the HCBS Quality Measure Set report are available for copy-over.

[Select report from dropdown.]

➔ **Which delivery sub-type will you be reporting on?**

- ☐ Delivery Method: MLTSS
- ☐ Delivery Method: FFS LTSS

➔ **Which rates will you be reporting on?**

- ☐ Performance Rate

POM: People Realize Personal Goals

➔ **Please select from which submitted Quality Measure Set report you would like to copy over baseline values (optional)**

Only measures submitted as part of the HCBS Quality Measure Set report are available for copy-over.

[Select report from dropdown.]

➔ **Which delivery sub-type will you be reporting on?**

- ☐ Delivery Method: MLTSS
- ☐ Delivery Method: FFS LTSS

➔ **Which rates will you be reporting on?**

- ☐ Performance Rate

POM: People are Free from Abuse and Neglect

➔ **Please select from which submitted Quality Measure Set report you would like to copy over baseline values (optional)**

Only measures submitted as part of the HCBS Quality Measure Set report are available for copy-over.

[Select report from dropdown.]

➔ **Which delivery sub-type will you be reporting on?**

- ☐ Delivery Method: MLTSS
- ☐ Delivery Method: FFS LTSS

➔ **Which rates will you be reporting on?**

- ☐ Performance Rate

NCI-IDD PCP-2: Person-Centered Goals

➔ **Which delivery sub-type will you be reporting on?**

- ☐ Delivery Method: MLTSS
- ☐ Delivery Method: FFS LTSS

➔ **Which rates will you be reporting on?**

- ☐ Performance Rate

NCI-IDD PCP-5: Satisfaction with Community Inclusion Scale

➔ **Which delivery sub-type will you be reporting on?**

- ☐ Delivery Method: MLTSS
- ☐ Delivery Method: FFS LTSS

➔ **Which rates will you be reporting on?**

- ☐ Performance Rate

NCI-IDD CI-1: Social Connectedness

➔ **Which delivery sub-type will you be reporting on?**

- ☐ Delivery Method: MLTSS
- ☐ Delivery Method: FFS LTSS

➔ **Which rates will you be reporting on?**

- ☐ Performance Rate

NCI-IDD CI-3: Transportation Availability Scale

➔ **Which delivery sub-type will you be reporting on?**

- ☐ Delivery Method: MLTSS
- ☐ Delivery Method: FFS LTSS

➔ **Which rates will you be reporting on?**

- ☐ Performance Rate

NCI-IDD HLR-1: Respect for Personal Space Scale

➔ **Which delivery sub-type will you be reporting on?**

- ☐ Delivery Method: MLTSS
- ☐ Delivery Method: FFS LTSS

➔ **Which rates will you be reporting on?**

- ☐ Performance Rate

NCI-AD: Percentage of people who are as active in their community as they would like to be

➔ **Which delivery sub-type will you be reporting on?**

- ☐ Delivery Method: MLTSS
- ☐ Delivery Method: FFS LTSS

➔ **Which rates will you be reporting on?**

- ☐ Performance Rate

NCI-AD: Percentage of people whose service plan reflects their preferences and choices

➔ **Which delivery sub-type will you be reporting on?**

- ☐ Delivery Method: MLTSS
- ☐ Delivery Method: FFS LTSS

➔ **Which rates will you be reporting on?**

- ☐ Performance Rate

NCI-AD: Percentage of people who feel safe around their support staff

➔ **Which delivery sub-type will you be reporting on?**

- ☐ Delivery Method: MLTSS
- ☐ Delivery Method: FFS LTSS

➔ **Which rates will you be reporting on?**

- ☐ Performance Rate

NCI-AD: Percentage of people who have transportation to get to medical appointments when they need to

➔ **Which delivery sub-type will you be reporting on?**

- ☐ Delivery Method: MLTSS
- ☐ Delivery Method: FFS LTSS

➔ **Which rates will you be reporting on?**

- ☐ Performance Rate

NCI-AD: Percentage of people who have transportation when they want to do things outside of their home

➔ **Which delivery sub-type will you be reporting on?**

- ☐ Delivery Method: MLTSS
- ☐ Delivery Method: FFS LTSS

➔ **Which rates will you be reporting on?**

- ☐ Performance Rate

HCBS-CAHPS: Planning Your Time and Activities Composite Measure

➔ **Which delivery sub-type will you be reporting on?**

- ☐ Delivery Method: MLTSS
- ☐ Delivery Method: FFS LTSS

➔ **Which rates will you be reporting on?**

- ☐ Performance Rate

HCBS-CAHPS: Choosing the Services That Matter to Your Composite Measure

➔ **Which delivery sub-type will you be reporting on?**

- ☐ Delivery Method: MLTSS
- ☐ Delivery Method: FFS LTSS

➔ **Which rates will you be reporting on?**

- ☐ Performance Rate

Baseline and Performance Target Information

Instructions

Indicate the baseline rate value, baseline measurement period, performance target value, and performance target timeframe for each selected measure.

- In the baseline value field, MFP grant recipients should report the performance rate value submitted as part of their reporting on the HCBS QMS in fall 2026.
- In the baseline measurement period, MFP grant recipients should report the month(s) and year(s) for which the baseline value represents.
- In the performance target value field, MFP grant recipients should report the 2028 state performance target values. The performance target timeframe should be 2028.
- In the "Notes on Relevance" column, provide 1 to 2 sentences about why this measure was selected.

The baseline value for the LTSS and POM measures can be found in the Quality Measure Set of the Medicaid Data Collection Tool (MDCT) and may be copied over from any submitted QMS report. For MFP grant recipients that report on NCI-IDD, NCI-AD, and/or HCBS CAHPS, the baseline value and the performance target value are captured outside of MDCT. MFP recipients will need to coordinate internally to input the reported value in this section.

[The following fields are displayed for each measure selected. Measure name, delivery sub-type, and rate labels reflect the selections made for that measure.]

[Selected measure]

Baseline Rate Values

Please provide the baseline value for each rate tied to this measure.

[Selected delivery sub-type]

[Displayed based on the delivery sub-type selected for this measure in the "Measure report" section.]

➔ **[Applicable rate description]**

[Baseline values may be populated from the submitted Quality Measure Set report selected in the "Measure report" section.]

[Response field]

➔ **Baseline Measurement Period**
In the baseline measurement period, MFP grant recipients should report the month(s) and year(s) for which the baseline value represents.

➔ **Baseline Measurement Start**
MM/YYYY

[Response field]

➔ **Baseline Measurement End**
MM/YYYY

[Response field]

Performance Target Values

Please enter the specific performance target for each baseline rate reported in the section above. The target should reflect the rate your state plans to achieve by the end of the next reporting period.

[Selected delivery sub-type]
[Displayed based on the delivery sub-type selected for this measure in the "Measure report" section.]

➔ **Target rate: [Applicable rate description]**

[Response field]

➔ **Performance Target Timeframe**
The performance target timeframe should be within the next reporting period.

➔ **Target Timeframe**
MM/YYYY

[Response field]

➔ **Notes on Relevance (optional)**
Provide 1-2 sentences about why this measure was selected.

[Response field]

C. QI Plan Overview

Strategy description
Describe the planned intervention(s), relevant partners, populations affected, and the rationale for the strategy (500 words).

[Response field]

Strategy dates
Enter a projected start date and, if known, a projected end date. Leave end month blank if the strategy is ongoing.

➔ **Start date**
Enter a projected start date for future strategies or enter a past start date for strategies in progress.
MM/YYYY

[Response field]

➔ **Projected end date (optional)**
Enter a projected end date or leave blank if the strategy will be ongoing without a set end point.
MM/YYYY

[Response field]

D. Key Activities

Instructions
Provide at least one key activity to support your Quality Improvement Plan. To begin, click the "Add key activity" button, which will open a pop-up window for data entry.

Within the modal, enter a concise, one-sentence title or description of the activity, and specify an expected completion month if one can be determined. You may repeat this process to add multiple activities as needed to fully outline your strategy.

Title or description
Provide a one-sentence title or description of the activity.

[Response field]

Expected completion month (optional)
Specify an expected completion month if one can be determined.
MM/YYYY

[Response field]

E. QI Plan Details

Instructions
Provide comprehensive details on how this Quality Improvement Plan is monitored, evaluated, and sustained.

Complete the Mandatory Sections:

- ➔ **Monitoring Approach:** Describe the tracking mechanisms, tools, or oversight processes used to monitor ongoing progress toward your performance targets.
- ➔ **Evaluation Summary:** Detail the strategy's specific success criteria, the data sources utilized, and how frequently the data is reviewed.

Word Count Note: Each text narrative should be concise yet thorough, aiming for approximately 250 to 300 words.

Monitoring approach
Briefly describe the tracking used to monitor progress toward the performance target (250-300 words).

[Response field]

Evaluation summary
Briefly describe the strategy's success criteria, data sources, and frequency of review (250-300 words).

[Response field]

F. Review & Submit

Ready to submit?
Double check that everything in your QMS QIP is accurate. Once you submit, you will only be able to make edits by contacting your CMS HCBS lead to unlock your report.

Compliance review
Your CMS HCBS lead will review your report and may contact you and unlock your report for editing if there are corrections to be made.

[In the submission portal, this page displays the completion status of each section and provides options to return to individual sections for editing, review the QIP as a PDF, and submit the QIP report.]
